

## CENTER FOR WILDLIFE STUDIES

### Instructor

#### **Position Description:**

We are currently recruiting instructors for 2024 that are subject matter experts interested in teaching online, in-person (classroom, field, or travel), or hybrid courses related to wildlife biology, marine sciences, ecology, environmental science, resource management, statistics and modeling, or other related fields. Please propose the course you would be most excited to teach to students and professionals around the world. See application details below.

#### **Our Global Mission:**

The Center for Wildlife Studies is a 501(c)(3) non-profit organization that provides accessible environmental education and promotes wildlife conservation through science.

#### **Why work for CWS:**

Although traditional academic institutions serve some learners well, many motivated students are left behind, including those with inflexible work schedules, school, and financial challenges. CWS develops and delivers specialized training for professionals and students while enhancing accessibility for underserved populations through our World Scholars Program.

CWS values our people and our mission. Many academic institutions increasingly rely on undercompensated adjunct professors who do not own the intellectual property they produce while employed. At CWS, we compensate our instructors based on a per person-model and we never own your materials. We also provide a matching 401(k) retirement plan and health benefits for all permanent employees, beginning at 0.25 FTE.

CWS is a flexible, family-friendly workplace and is an equal opportunity employer with a positive commitment to diversity and inclusion. We do not permit discrimination or harassment based on race, color, religion, sexual orientation, gender identity or national origin, either in employment practices or in the workplace.

Consider joining an organization that is making a real difference.

#### **How to Apply:**

To apply, please send us your application including the following materials: (1) cover letter, which includes a description of the course(s) you would like to teach; (2) CV, which includes your teaching and research experience; and (3) contact information for three references. Send questions and submit your application materials as a single PDF file to [apply@centerforwildlifestudies.org](mailto:apply@centerforwildlifestudies.org). Applications will be reviewed beginning January 1, 2024.
